Dr Ji-Ping Lin
Associate Research Fellow
Research Center for Humanities and Social Sciences, Academia Sinica

Ji-Ping received B.Sc. in Geography from National Taiwan University (Taiwan) in 1988, M.Sc. in Statistics from National Central University (Taiwan) in 1990, and Ph.D. in Geography in 1998 from McMaster University (Ontario, Canada). His main research specialty and interests include migration and population studies, labor study, survey study, scientific & statistical computing, big & open data, data science & data engineering, and open science. He is working at Academia Sinica, Taiwan. He ever worked in Taiwan's Bureau of Statistics & Census as research scientist, with abundant real-world experiences in processing, integrating, and enriching various sources of large-scale raw data, as well as in survey planning, sampling design, and conducting surveys. He has been serving as consultant for a number of Taiwan's central government agencies. Since 2013, he devotes himself to the research on hard-to-reach population (HRP) and Taiwan Indigenous Peoples (TIPs). Based on the fundamentals of computational social science, data science and open science, he has been building a number of big open data and smart data that help overcome long-term research data shortages of contemporary Taiwan Indigenous Peoples and ethical issue. For details about his publication, see ORCiD: https://orcid.org/0000-0003-2348-9243
