Professor Kenneth Fong
Associate Head (Research) and Professor
Department of Rehabilitation Sciences
Director, Research Centre for Assistive Technology
The Hong Kong Polytechnic University

Kenneth Fong is Professor and Associate Head (Research), Department of Rehabilitation Sciences, and Director of the Research Centre for Assistive Technology at The Hong Kong Polytechnic University (PolyU). He is an occupational therapist by background training. He is now the management committee member of the Research Institute in AIoT, and management committee member of the University Research Facility in Behavioral and Systems Neuroscience (UBSN), chairman of the University Ethics, Diversity and Inclusion Committee. He is now the Editor-in-Chief of Hong Kong Journal of Occupational Therapy (IF: 1.6), and honorary advisors of several NGOs and supporting organizations for people with chronic diseases and disabilities in Hong Kong. He is member of the Supplementary Medical Professions Council, and chairman of the Education Committee and Examination Committee of the Occupational Therapists Board, Hong Kong SAR. He received the Department Outstanding Teaching Award in 2011, the Department Outstanding Team Teaching Award in 2018, and the Faculty Team Teaching Award of the Faculty of Health and Social Sciences in 2010 and 2019 respectively. His research interests are neurorehabilitation, assistive technology and human performance. Recently he received the best paper award from UBSN of PolyU in 2024, and was awarded the World's Top 2% Scientists (Rehabilitation) by Stanford in 2024.
