

Jeff Boissoneault
Associate Professor
Department of Anesthesiology
University of Minnesota

Jeff Boissoneault is an Associate Professor in the Department of Anesthesiology at the University of Minnesota and the director of the Minnesota Alcohol and Pain Lab (MAPL).

His research focuses on the application of behavioural, psychophysiological, and neuroimaging approaches to the study of pain and related constructs; alcohol and substance use; and their interaction. He also has interest in mechanisms underlying placebo efficacy, pain-related decision making, and the acute and chronic neurobehavioral effects of alcohol use.
