[BSocSc(Elite)]

Bachelor of Social Sciences Elite Programme
[BSocSc(Elite)]

Duration of Study

4 **Years**

Offered by the Faculty of Social Sciences, this interdisciplinary programme is grounded in the study of contemporary social issues and technological transformation. Through the integration of social science perspectives and real-world applications, students critically examine the major forces shaping contemporary societies, including the growing influence of artificial intelligence and data-driven technologies, demographic change, evolving patterns of work and social life, geopolitical uncertainty, and the climate emergency. Particular attention is given to the implications of these developments for Hong Kong, the region, and the wider world.

Guided by an ethos that students are active participants in their own learning, BSocSc(Elite) students pursue their major and minor studies within the broad and flexible BSocSc curriculum while engaging with interdisciplinary perspectives. Building on this foundation, the programme offers a distinctive range of enrichment opportunities designed to foster intellectual curiosity, social responsibility, ethical awareness, personal growth, leadership development, and global engagement.
